

AMERICAN-LaFRANCE

TYPE DESIGNATIONS & SPECS.

FROM TYPE 1 THROUGH THE 600 SERIES.

1902 thru 1946

Compiled by John M. Peckham

The following list may contain some errors due to incomplete and/or contradictory source material. While wheelbases were usually listed in early Specification Book Files, later ones that listed only "Bill of Materials" entries, did not give specifics. This, too, is the reason for a lot of other missing information.

The following Type designations are based on the "Spec. Books", and on a detailed list done by the late Claire Horton. Even so, they leave many unanswered questions. Catalogs and other literature do little to fill in the gaps, being pretty vague in many respects. In spite of all this, this chart should be of considerable help in identifying the various Types and Models. Any corrections and/or additions will be greatly appreciated.

YEAR	TYPE	STYLE	MOTOR							TRANS.	DRIVE	WB	PUMP	CAP.	REMARKS	First one built	
			MAKE	TYPE	CYL.	BORE	STROKE	HP	REG. NO.							CITY
